Work Experience

Full-Stack Developer

December 2024 – Present

Dream Technology | Solapur

- Successfully developed and launched projects, delivering scalable, secure, and user-friendly solutions.
- Spearheaded the creation of dynamic user interfaces using HTML, CSS (including frameworks like Bootstrap), and JavaScript, ensuring compatibility across modern browsers.
- Designed and optimized MySQL database schemas for high-performance, complex queries, improving data processing time.
- Led back-end development with PHP, implementing RESTful APIs.

Web Developer

June – July 2024

Unified Mentor, (Internship)

- Created projects like GYM Management System, Todo List, Personal Portfolio to work as an intern in the company.
- Contributed to the development of responsive web applications using React.js and Tailwind CSS, delivering visually appealing and user-friendly interfaces.
- Gained hands-on experience in optimizing front-end code for scalability and maintainability, adhering to best practices in modern web development.
- Assisted in debugging and troubleshooting issues, ensuring smooth project delivery within tight deadlines.

Skills

HTML, CSS, Javascript, React Js, Redux, PHP, MySQL, Tailwind CSS, Bootstrap, Git, Github.

Projects

Typing Skill Enhancement Portal Built with ReactJS, Firebase and Tailwind CSS.

- Provides real-time feedback on the speed, accuracy, and progress, allowing users to monitor their development over time.
- Offers personalized insights and recommendations, making it suitable for beginners as well as experienced typists looking to enhance their skills.
- Includes a variety of exercises, challenges, and the drills that help users gradually increase both speed and efficiency while typing
